

LUB 15-10

Sulfited Fatliquor

SPECIFICATIONS

Composition	Sulfited fish oil.
Appearance	Viscous, brown coloured liquid.
Active substance	Approx. 65 %
Charge	Anionic.
pH (10% solution)	Approx 7.0
Tanning bath stability	Very good.

PROPERTIES

LUB 15-10 is highly sulfited fish oil type, recommended for the manufacture of extremely softy leathers with no residual odour.

In view of its strong penetration and the excellent surface distribution of the fatliquor on the skin, LUB 15-10 is particularly indicated for the manufacture of very soft splits and leathers for clothing, upholstery and leather goods.

The skins treated with LUB 15-10 are very light, having a high tear resistance, soft feel and dry hand.

APPLICATIONS

It can be used alone (emulsified with water at 50°C 1:3) and combined with other sulfited or raw oils. We recommend using it especially as a tanning pre-fatliquor.

RECOMMENDATIONS

Fatliquor of chrome tanned splits for suede goods:
8.0% LUB 15-10

Fatliquor of calf-skins for clothing leather:
5.0-8.0% LUB 15-10

PACKAGING

120 Kg plastic drum and 1000 Kg IBC

Version 0001 – February 2017
