

AUXILAM D-40

Leather dyeing aid

Technical characteristics

Chemical nature:	Modified fatty ester mixture, solubilizer, additives
Aspect:	Fluid, colourless to pale yellow liquid
Ionic character:	weakly anionic
pH value:	5.5 – 8.5
Solubility:	Water soluble in all proportions

Properties

AUXILAM D-40 is a low-affinity unison agent for leather. It regulates the rise of acid and metalliferous dyes in the skin and promotes a homogeneous and deep penetration of the shade.

AUXILAM D-40 is non-toxic and biodegradable.

Dosage

1 to 2% on the weight of the skins

Packaging

- 120 kg drum
- 1000 Kg net container

Version 0001 - Date: 01/2009
